

ARKAR MANN AUNG

JUNIOR WEB DEVELOPER

PERSONAL

I am 30 years old. I graduated with mathematics and got a diploma in construction while working on my parents' construction business. In the construction industry, I have five years of experience in government tender estimates.

The Corona outbreak in 2020 shut down construction, but I kept trying hard to make a living with my original hobby, programmer.

I am also preparing to take technical exams like ITPEC. I'm easy to learn skills and easy to get used to in any organization. I have a good relationship with everyone and have a habit of caring for others.
